- When correcting timed test I only correct the highlighted portion of each test. (Right side, first 12 facts listed vertically) Each fact 1-12 will be represented somewhere within that portion of the timed test. I do not tell my students this! However, I consider themselves lucky if they sneak an incorrect response past me.

- I have included a tiny little symbol:  $\wedge$  on every timed test to show you where to stop correcting if you are using my shortcut. So simply start correcting at the top of the right column of the timed test, and stop when you see the symbol  $\wedge$ . This signals to you that you have corrected at least one of every fact (1-12) for that individual student.

- Also at the bottom of every timed test (besides the doubles) Each test is marked with a small A, B, C, or D. Each test (besides the doubles) comes in 4 different versions. This allows students that have to retake a timed test to see a different version of it. My students must pass off the A, B, C, and D version of the mixed review in order to say they have passed off their multiplication and division facts.

As always I LOVE your feedback! Make sure to follow my store Teaching on Lemon Lane at Teachers Pay Teachers to stay up-to-date on new products, sales, and of course FREEBIES :)

If you are like me I struggle to find time in the day to correct and handback division fact timed tests... Thus, I have included a few shortcuts to make your life a little easier and incorporating timed tests in the classroom a little less time consuming.
